# Preamble to Statements of Federal Financial Accounting Concepts

---

Each Statement of Federal Financial Accounting Concepts (SFFAC) is part of a series of concepts statements intended to set forth objectives and fundamentals on which financial accounting and reporting standards will be based. The objectives identify the goals and purposes of financial reporting. The fundamentals are the underlying concepts of financial accounting-concepts that guide the selection of transactions, events, and circumstances to be accounted for; their recognition and measurement; and the means of summarizing and communicating them to interested parties.

The Federal Accounting Standards Advisory Board's (FASAB or "the Board") conceptual framework enhances the consistency of standards and serves the public interest by providing structure and direction to federal financial accounting and reporting. The most direct beneficiaries of the FASAB's concepts statements are the Board itself and preparers and auditors of federal financial reports. The statements guide the Board's development of accounting and reporting standards by providing the Board with a common foundation and basic reasoning on which to consider the merits of alternatives.

Knowledge of the objectives and concepts the Board considers should help users and others who are affected by or interested in federal financial accounting and reporting standards to understand better the purposes, content, and qualitative characteristics of information provided by federal financial accounting and reporting. That knowledge should enhance the usefulness of, and confidence in, federal financial accounting and reporting.

Concepts statements enhance preparers' and auditors' understanding of the common foundation and reasoning employed in considering alternatives. The GAAP hierarchy provides that statements of federal financial accounting standards constitute level A (the highest level) guidance. Statements of federal financial accounting concepts are not GAAP. Instead, concepts statements constitute "other literature" and may only be relied upon by financial statement preparers and auditors to resolve specific accounting issues in the absence of GAAP literature. In developing and amending accounting standards, the Board looks to concepts statements for guiding principles and also considers relevant existing standards and guidance issued by the Board and other standard setting bodies. Until the Board amends existing standards, the Board expects practice to be governed by the accounting principles embodied in the four levels of the GAAP hierarchy. Thus, the Board distinguishes between material presented in concepts which are used to guide Board deliberations on future GAAP and accounting principles presented in standards which constitute current GAAP. (Appendix C presents the sources of generally accepted accounting principles.)

For federal entities, in the absence of specific authoritative literature applicable to a transaction or event, it should be possible to report the event or transaction by selecting an established accounting principle for an analogous transaction or event that appears appropriate when applied in a similar manner. In the unusual case where an analogy cannot be drawn to established authoritative literature, the GAAP hierarchy permits consideration of other literature including

---

concepts statements. Consideration of individual concepts statements will be helpful but often may not provide sufficient guidance in resolving emerging issues. Therefore, the Board encourages careful study of the conceptual framework and established practice in resolving such issues.

Statements in this series describe concepts and relations that will underlie future federal financial accounting standards and practices and in due course will serve as a basis for evaluating existing standards and practices. With issuance of this statement, the series of concepts statements comprises:

- SFFAC 1, Objectives of Federal Financial Reporting (includes the qualitative characteristics of information in financial reports)
- SFFAC 2, Entity and Display
- SFFAC 3, Management's Discussion and Analysis
- SFFAC 4, Intended Audience and Qualitative Characteristics for the Consolidated Financial Report of the United States Government
- SFFAC 5, Elements of Accrual-Basis Financial Statements and Basic Recognition Criteria
- SFFAC 6, Distinguishing Basic Information, Required Supplementary Information, and Other Accompanying Information
- SFFAC 7, Measurement of the Elements of Accrual-Basis Financial Statements in Periods After Initial Recording

Like other pronouncements of the FASAB, Statements of Federal Financial Accounting Concepts remain in effect until amended, superseded, or withdrawn by appropriate action under the Board's Rules of Procedure.
